

TUAN NGUYEN ANH

Frontend Developer

☎ 0966786958 ✉ tuanna184.dev@gmail.com 🔗 [linkedin.com/in/tuanna-developer/](https://www.linkedin.com/in/tuanna-developer/) 📍 Hanoi

OBJECTIVE

- Four years of working experience in web development.
- Strength in front-end development, especially Angular.
- Ability to learn and apply new technology quickly.
- Good teamwork and communication.
- My upcoming goal is to study frontend in-depth and become a expert frontend developer.

EDUCATION

University of Engineering and Technology - Hanoi National University 08/2018 - 06/2022

Software technology

Graduated with a Bachelor's Degree with Good

WORK EXPERIENCE

AGP., JSC (Onsite TCB) 10/2024 - Present

Frontend Developer

- Developed and maintained responsive user interfaces for multiple web applications using Angular, TypeScript, and HTML5/CSS3.
- Collaborated with designers and backend developers to create visually appealing and high-performing user experiences.
- Implemented accessibility features.
- Maintenance and fix bugs are detected

SOTATEK., JSC 04/2024 - 10/2024

Frontend Developer

- Developed and maintained responsive user interfaces for multiple web applications using Angular, TypeScript, and HTML5/CSS3.
- Collaborated with designers and backend developers to create visually appealing and high-performing user experiences.
- Optimized website performance, reducing load times through code refactoring and image optimization.
- Implemented accessibility features.
- Maintenance and fix bugs are detected

HRI., JSC (Onsite BaoViet) 07/2023 - 04/2024

Frontend Developer

- Solve assigned problems regarding the website interface.
- Propose solutions to solve problems encountered in the project.
- Maintenance and fix bugs are detected.

JVB., JSC 07/2021 - 07/2023

Frontend Developer

- Implement code according to project description.
- Propose solutions to solve problems encountered in the project.
- Maintain implemented projects and fix bugs.

SKILLS

Technical Skills	• Proficient in programming with Angular, Angular Material, Ng-Zorro, PrimeNG. • Master the knowledge of HTML5, CSS3, SCSS, TailwindCSS, JavaScript, TypeScript and RxJS/ • Learn about frameworks like NextJS, VueJS, Lit, Astro. • Have an understanding of knowledge related to responsive websites, and layout design. • Proficient in using GIT, code format tools, comment code. • Have knowledge of backend like NodeJS, NestJS. • Strong knowledge of DSA, design patterns and rendering patterns.
Soft Skills	Good teamwork and communication.
English	B1 English certificate, basic communication

PROJECTS

Corporate Banking Website	10/2024 - 04/2025
Frontend Developer	
Customer: Vietnamese customers	
Team size: 15	
Technology: Bootstrap, Angular 13 update to Angular 18	
• Develop and enhance frontend features. • Upgrade system versions and ensure smooth transitions. • Implement unit tests to ensure code quality, stability, and performance using Jest testing. • Develop and integrate Backbase banking components. • Collaborate with backend teams to optimize API integration and data handling. • Maintenance and fix bugs are detected	
Promise Report Website	08/2024 - 10/2024
Frontend Developer	
Team size: 12	
Technology: Angular 16, TailwindCSS	
• Build the main layout, separate modules. • Build common components, shared guards, services, pipes, directives,... • Build the base tree view to apply to common tree select tree and table tree. • Develop solutions for the new functions required by customer. • Maintenance and fix bugs are detected	
ISO Certification Website	04/2024 - 08/2024
Frontend Developer	
Team size: 12	
Technology: Angular 16, PrimeNG, Bootstrap	
• The main features I am responsible for are: • Build common components, shared guards, services, pipes, directives,... • Develop pdf export feature. • Develop solutions for the new functions required by customer • Maintenance and fix bugs are detected	
Generate Report Website	01/2024 - 04/2024
Frontend Developer	
Team size: 10	
Technology: Angular 17, Ng-zorro-antd, TailwindCSS, OAuth2, SSR	
• Build the main layout, separate modules • Build code to display tree data • Logic processing on data tree • Maintenance and fix bugs are detected	

Frontend Developer

Team size: 10

Technology: Angular 15, Ng-zorro-antd, TailwindCSS

- Build the form connection code using recursion in the interface
- Build code to handle drag and drop and configure information fields
- Maintenance and fix bugs are detected

Content Management System Website

09/2022 - 03/2023

Front-end Developer

Team size: 8

Technology: Vue2, Vuetify

- Create a reusable generic table component
- Apply techniques to lazy load large data lists
- Maintenance and fix bugs are detected

Task Management Website

05/2022 - 05/2023

Frontend Developer

Team size: 8

Technology: Angular 12, Angular Material, NgRx

- Build the main layout, separate modules
- Build state management using NgRx
- Maintenance and fix bugs are detected

Cyber Range Courses Website

07/2021 - 10/2022

Front-end Developer

Team size: 10

Technology: Angular 13, Angular Material, d3.js, ngx-socket-io, ngx-translate, OAuth2

- Use the d3.js library to create a drag-and-drop interface configuring network protocols
- Use ngx-socket-io to connect to the websocket server for implementation live streaming
- Use the ngx-translate library to perform client-side language conversion for many different modules
- Maintenance and fix bugs are detected

COURSES

- Take the course about frontend development at fullstack.edu.vn
- Take the course about frontend development at greatfrontend.com

INTERESTS

- Read books and blogs about frontend techniques
- Participate in web development forums
- Practice algorithms on Leetcode
